

MANAGED NETWORK SERVICES

HawkNet is a suite of Managed Network and Communications Services designed to provide highly reliable connectivity to people and critical infrastructure located in remote, harsh environments.

Whether you operate a remote water treatment plant, a distant wind farm, or some oil platform miles offshore, **BlackHawk Datacom** specializes in keeping you connected to your business. We recognize that each type of operation has its own unique set of challenges, so we focus on providing specialized solutions tailored to overcome those challenges.

We deliver flexible, scalable, end-to-end communications solutions for the entire life-cycle of your assets. Leveraging our industry experience and the latest technologies, we provide world-class service to help significantly reduce your operating costs.

ABOUT BLACKHAWK DATACOM

BlackHawk Datacom provides innovative technology solutions that help our customers “Connect, Protect and Optimize” their critical infrastructure assets. Our Communications, Physical Security and Process Automation products and services are specifically designed for operations in remote, harsh environments. Our focus is on operators in the Oil and Gas, Maritime and Utility industries that provide critical services to millions of customers and can’t afford loss of service or down time. We support these operations with highly trained personnel from Regional Operations Centers located in Port Fourchon, LA, Houston, TX, San Antonio, TX, Midland, TX and our 24x7 hardened Incident Command Center located in Lafayette, LA.
